Mountain Bike Reviews

Fuel EX Fuel EX 9.9	Editor's Choice Winner	It's got balance and poise that had us hucking road gaps and charging steep bike park terrain. It's equally at home in the backcountry where staccato rock gardens and rough trails are the norm. Bicycling Editor's Choice	Bicycling
Stache Stache 9.8	The world's best hardtail	It's a big, brawny, fun-loving bike with speed and agility that belie its stature. You'd be hard-pressed to find a more entertaining bike. Outside's 6-month Stache review	Outside
Fuel EX Fuel EX 7 29	10 out of 10. Nailed it.	Whether you're grinding up a climb, pumping down a flowing section of primo singletrack, or simply hanging off the back and surfing a steep, sketchy descent, The Fuel EX keeps its cool so you'll never lose yours. MBR's glowing Fuel EX 7 review	MBR UK
Slash Slash 9.9	An absolute stunner	It's a precise ride without ever transferring harshness through to the rider. That's a good thing, too, as you'll be plowing through all sorts of burly terrain without hesitation aboard this confidence-inspirer. Dirt 100 Slash review	Dirt
Powerfly FS Powerfly FS 9	4 out of 5 stars	Makes its own fun where you'd normally be hurting. Its sheer thirst for mileage means it's perfect for the adventurer who wants to run their own uplift, and there are few tools that will do the job better. Bike Radar reviews 2018 Powerfly FS	Bike Radar
Stache Stache 7	Ridiculously fun	The Stache simply rolls along like nothing I've ridden. It's a package of complementary components perfectly suited to a broad variety of mile-munching singletrack riding. NSMB Stache review	NSMB.com
Remedy Remedy 9	Test Winner: Best Value	Tearing up the trail at high speeds or nailing those corners, the Remedy is a super-versatile bike that knows how to deliver a good time. It's a bike for stomping on the gas! Enduro-MTB.com's Remedy review	Enduro-MTB.com
Remedy Remedy 9.9 RSL	4.5 out of 5 stars	A playful rider's dream. It truly deserves the all-mountain designation. It's a proficient climber ready to tackle rowdy descents and is quick all places in between. Vital MTB rides the Remedy	Vital MTB
Powerfly FS Powerfly FS 9	Gravity killer	The 130mm rear suspension handles hits of all sizes and the frame is laterally stiff enough so you don't have to ride it like an e-bike on aggressive descents. You just ride it. MTBR rides new 2018 Powerfly FS	MTBR.com
Slash Slash 9.9 RSL	The new standard	Slash is great everywhere and descends with almost the same confidence as a downhill rig. It's nearly perfect and might just be the new standard by which all others are measured. Vital MTB raves about Slash	Vital MTB
Remedy Remedy 9.9 RSL	Ideal weapon	It slammed through bedded rock gardens, carved up wall rides, and landed six-foot drops to flats and never felt squeamish or squirrely. This bike just wants to jump, hop, and pop over and through anything you can find. Outside's Remedy review	Outside
